## Projects

---

### EMS - Enquiry Management System

- Developed a web-based Enquiry Management System using ASP.NET Core MVC, Entity Framework Core, and SQLite to manage the complete lifecycle of student enquiries, including tracking, staff assignment, and status management.
- Implemented features like communication logging, scheduled follow-ups with reminders, role-based authentication (Admin/Staff), and reporting dashboard to streamline enquiry handling and improve conversion tracking.
- Tools & Technologies: ASP.NET Core 9.0, C#, Entity Framework Core, SQLite, Razor Views, Bootstrap, ASP.NET Core Identity, Visual Studio 2022, Git & GitHub.

### TMS - Task Management System

- Developed a web-based Task Management System using ASP.NET Core MVC and C# to enable users to create, update, delete, and track tasks with status management (Pending, In-Progress, Completed).
- Implemented user authentication, session handling, and custom middleware (SessionRestoreMiddleware) along with clean MVC architecture and dependency injection for better scalability and maintainability.
- Tools & Technologies: .NET 7/8, ASP.NET Core MVC, C#, Entity Framework Core, SQL Server, Visual Studio, Git & GitHub, appsettings-based configuration.
