ABOUT ME

Motivated Computer Science undergraduate with hands-on experience in developing scalable applications, including a Timetable Scheduler, Enquiry Management System (EMS), and Task Management System (TMS), using Flutter, Firebase, .NET Framework, C#, and SQL Server. Passionate about software development, problem-solving, and designing efficient, user-centric solutions with clean architecture and modern technologies. Eager to contribute to innovative projects while continuously expanding technical expertise in cross-platform application development and backend systems.

EDUCATION

B.Tech in Computer Science at The ICFAI University, Jaipur	2023 - 2027
Class 12th Bihar Board	2023
Class 10th CBSE Board	2021

WORK EXPERIENCE

Web Developer Intern at CLR Infotech	May 2025 - August
Engineered the Enquiry Management System (EMS) and Task Management System (TMS) using .NET Framework, C#, and SQL Server Express, significantly reducing manual tracking efforts by approximately 40% and improving overall workflow efficiency. Designed and implemented lead management and task tracking modules with real-time status updates, enabling seamless monitoring of enquiries and tasks. Developed role-based dashboards and reporting features to enhance data visibility, streamline operations, and support informed decision-making through efficient backend architecture.	

PROJECTS

EMS - Enquiry Management System	Github
Built a web-based Enquiry Management System (EMS) to streamline student enquiry management through efficient tracking, staff assignment, and status updates. Implemented role-based authentication, follow-up reminders, and communication logging to improve collaboration and ensure timely engagement with prospective students. Designed an interactive reporting dashboard that enhanced enquiry handling, improved data visibility, and enabled better monitoring of enquiry progress and conversion rates.	
TMS - Task Management System	Github
Developed a web-based Task Management System (TMS) to facilitate task creation, assignment, updates, and status tracking, improving team productivity and workflow management. Implemented user authentication, session handling, and custom middleware to ensure secure and reliable application operations. Leveraged a clean MVC architecture with dependency injection to build a scalable, maintainable, and well-structured application that supports future enhancements.	
TimeTable Scheduler	Github
Developed a cross-platform Timetable Scheduler System using Flutter, Dart, and Firebase to automate academic timetable generation for multiple departments and programs. Implemented a Greedy Algorithm with heuristic conflict handling to generate conflict-free schedules by optimizing faculty allocation, classroom and laboratory assignments, and lecture distribution. Integrated Firebase Firestore for real-time data management and Firebase Authentication for secure role-based access (Admin, Faculty, and Student), enhancing scheduling efficiency and reducing manual administrative effort.	

CERTIFICATES

Participat	India Innovates Hackathon	2026
Python 101 for Data Science	IBM Cognitive Class	2025
Canva Essentials	Canva Design School	2024
Graphic Design Essentials	Canva Design School	2024
The Joy of Computing Using Python	NPTEL (IIT Madras)	2024
Introduction to MongoDB	MongoDB University	2024

SKILLS

Programming Languages	C, C#, Python, Dart, Java, SQL
Web	.NET Framework, Flutter, HTML, CSS
Database	MySQL, Firebase
Tools & Platforms	Git, GitHub, Cursor AI, VS Code, Canva, Figma, Android Studio
